Create Art with Code

Build your unique drawing App

A number guessing game

Thanks to you for making him learn so well. He is enjoying so much and doesn't want the program to end. His father also really liked the Apps which he is creating.

REHAAN'S MOTHER

Karan has a unique blend of patience and tenacity to get kids to focus and joyfully learn the course content. The content of the course has also been a treat for us as parents. Our son smoothly entered into the world of Coding thanks to the carefully designed course content and at the end of 1 month he is pretty confident and is on a roll getting his hands dirty in coding.

VEDANGAH'S MOTHER
